BE IN THE KNOW

TM-P1-BLK

Movement Detection Starter Package with Base Station & Wrap-Around Beacon making it easy for firearm owners to deploy, setup, and start using their movement detection system.

This package includes -

- (1) Base Station
- (1) 120 Volt Outlet Adapter
- (1) Wrap-Around Beacon
- (1) Key Ring Holder
- (1) Set of Outlet Faceplate Screws

Base Station – TM-GW1-WHT

The TagMe Base Station is the smart data hub that communicates with & integrates all Ocufii beacons in your home system. The base station connects wirelessly to the home Wi-Fi network and plugs into a 120V outlet.

Locate the base station close to the Ocufii beacons and home Wi-Fi router for optimal system communication.

On / Off Status LED
(Fast LED Blink – ON)
(One LED Blink – OFF)

Removable Beacon

Key Ring Holder
(Optional)

Wrap-Around Beacon – TM-B1-BLK

The TagMe Wrap-Around Beacon is a movement detection device developed by Ocufii. This beacon includes a silicone band and key ring adapter making it simple to install directly on any firearm, firearm safety device, storage case, or carrying bag.

Locate the beacon(s) close to the Ocufii base station for optimal system communication.

Download the Ocufii App

1. Scan QR Code
(on the screen or front of the product box)

2. Select App Store or Google Play
(to be redirected to the appropriate store)

3. Download App to Your Cell Phone

Create an Account

1. Open App
(Click on Sign Up Here Link)

The screen shows the Ocufii logo at the top. Below it is an email input field and a 'Sign In' button. At the bottom, there is a link 'Don't have an account? Sign Up Here' which is highlighted with an orange dot and a line pointing to it. There are also links for 'Privacy Policy', 'Terms of Service', and 'User Agreement'.

2. Enter Valid Email

The screen shows the Ocufii logo. Below it, a message says 'We didn't find an account with that email. Create your account now:'. There is an email input field containing 'Sam@Spade.com' and a 'Next Step' button. At the bottom, there is a link 'Have an account? Return to Sign In' and links for 'Privacy Policy', 'Terms of Service', and 'User Agreement'.

3. Verify Email
(Two-Step Verification)

The screen shows the Ocufii logo. Below it, a message says 'Two-Step Email Verification'. There is a green checkmark icon in a circle. Below the icon, a message says 'Verified! You have successfully verified your email.' There is a 'Continue' button. At the bottom, there is a link 'Have an account? Return to Sign In' and links for 'Privacy Policy', 'Terms of Service', and 'User Agreement'.

4. Complete Your Profile

The screen shows the Ocufii logo. Below it, a message says 'Finish creating account'. There is an email input field containing 'Sam@Spade.com'. Below it is a 'Name (optional)' input field. Below that is a 'Type Your Password' input field. Below that is a 'Confirm Your Password' input field. Below the password fields, there is a message 'Password must be at least 6 characters and contain 1 upper case, 1 lower case, 1 number, and 1 special character'. There is a 'Next Step' button. At the bottom, there is a link 'Have an account? Return to Sign In' and links for 'Privacy Policy', 'Terms of Service', and 'User Agreement'.

5. Accept Terms of Service

The screen shows the Ocufii logo. Below it, a message says 'Review & Accept Privacy Policy, Terms of Service, & User Agreement'. There is a scrollable text area containing a long paragraph of placeholder text. Below the text area, there is an 'Accept & Complete Setup' button.

6. Congratulations
(Your Account Has Been Created)

The screen shows the Ocufii logo. Below it, a message says 'Review & Accept Privacy Policy, Terms of Service, & User Agreement'. There is a scrollable text area containing a long paragraph of placeholder text. Below the text area, there is an 'Accept & Complete Setup' button.

Select a Subscription

1. Open App & Sign In

2. Click on "Select a Subscription"

3. Select a Notification Plan

4. Enter Discount Code (Optional)

5. Congratulations (You selected a Notification Subscription)

Notes:

- The "Add a Device" menu is the first screen shown when logging into the app for the first time.
- Click on "Select a Subscription" to see the different subscription plans that are available.
- The "Group Notification Service" is the default plan select by the system. You can change this selection by clicking on a plan of your choice.

Notes:

- If you have a "Promo / Discount Code", enter it after selecting a plan of your choice. Your credit card will not be billed for service until the promo code has expired.
- All new accounts receive 30 days of FREE Service.

Add a Base Station

1. Open App & Sign In

2. Click Add a Base Station (Follow Software Guided Steps)

3. Scan Base Station QR Code

4. Connect Base Station to Wi-Fi

5. Power Up Base Station & Finalize Setup

6. Congratulations (You added a Base Station)

Notes:

- When connecting base station to Wi-Fi, allow access to your phone's location to get the current connected Wi-Fi network name.
- Enter a valid password to get access to the Wi-Fi network.

Notes:

- Repeat this process to add more base stations to your system. (There is a maximum of 5 base stations per system & account.)

Add a Beacon

1. Open App & Sign In

2. Click Add a Beacon (Follow Software Guided Steps)

3. Scan Beacon QR Code

4. Enter Beacon Information

5. Power Up Beacon & Finalize Setup

6. Congratulations (You added a Beacon)

Notes:

- Repeat this process to add more beacons to your system. (There is a maximum of 10 beacons per system & account)

FAQ's

How many base stations can I have in my account?

You can have a maximum of 5 base stations in an account.

How many beacons can I connect to one base station?

You can have a maximum of 10 beacons connected to one base station.

What is the coverage range of a base station?

A base station has a maximum range of 150 feet radius in open air. Walls, furniture, & metal reduces the coverage range of the base station and should be considered when setting up a system. For optimal communication coverage, install the base station as close as possible to your beacons and Wi-Fi router. If needed, add another base station to get better coverage.

What is the coverage range of a beacon?

Just like the base station, walls, furniture, & metal reduces the coverage range of the beacons and should be considered when setting up a system. For optimal communication coverage, install the beacons as close as possible to your base station. If needed, add another base station to get better coverage.

How fast will I get a movement notification on my cell phone?

Getting movement notifications on your phone depends on the speed of your internet service, the speed of your cellular network, and your cellular coverage. Based on the different conditions, getting movements notifications on your phone can take from 5 seconds to 15 seconds from the time that we receive movement data in our cloud platform from the base station.

Can I install a beacon inside a metal box or safe?

We do not recommend that you install a beacon inside a metal box or safe as the metal enclosure will prevent any signal propagation.
